NEW DELHI 3 (INDIA);
The 8th May, 1950.

S. P. JAIN,
for Registrar General, India

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers or the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 15th April, 1950.

* In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used :—B.—Births; B. R.—Birth rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D. D.—Dysentery and Diarrhoea; R. D.—Respiratory Diseases; M. D.—Maternal Deaths; D. R.—Death Rate; I. D.—Infantile Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for week ending the 15th April 1950 relate to 136 towns with an estimated population of 20,236 thousands. The total number of towns is 231 and their population is 28,352 thousands. Thus 59% of the total number of towns representing 71% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 9,474 and 7,908 representing birth and death rates of 24.3 and 20.3 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 117 towns with an estimated population of 17,676 thousands. Information about Assam, Bihar and Madras could not be included. The total number of towns is 199 and their population is 24,599 thousands. Thus 59% of the total number of towns representing 72% of the total population is covered. The numbers of births and deaths recorded in these towns were 8,198 and 7,035 representing birth and death rates of

24.1 and 20.7 per thousand of population respectively. The table at the end gives the position by states.

Malegaon in Bombay was the only town which had a high death rate of 109.1 per thousand of population and this high death rate was largely due to deaths from fevers and Smallpox.

(B) States (Part B):—The data here relate to 19 towns with an estimated population of 2,560 thousands. The total number of towns is 32 and their population 3,753 thousands. Thus 59% of the total number of towns representing 68% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,276 and 873 representing birth and death rates of 25.9 and 17.7 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
